Important Information Regarding Rebates:

- ▶ A rebate is offered to residential members who have purchased or leased a qualifying new or used electric vehicle (EV) and have installed a qualifying Level 2 (240 volt) charger at their residence. The member must agree to sign up for the time of use rate in order to be eligible for the rebate.
- ▶ The qualifying Level 2 EV charger must be new, purchased in 2018 and installed to meet all applicable codes. The charger must be single-phase and shall not exceed 7.5 kW. Proof of EV charger purchase is required. The EV must be DMV registered to the member at the SVE service address.
- ▶ Members can receive a rebate up to 35% of the cost of the EV home charger including installation costs or a maximum rebate of \$250.
- ▶ Refer to the current rate schedule for more details on the time of use rate. If you choose to go off the time of use rate at some point and request a submeter for our alternative vehicle-plug program, there will be a \$250 charge for the installation of that equipment. Members who participate in the electric heat rate program will continue to get that rate for their equipment and will not be impacted by fluctuating on/off-peak rates.
- ▶ **Each account is eligible for one rebate.**
- ▶ Fill this form out completely. Incomplete forms will not be processed. A copy of proof of purchase/sales receipt and documentation verifying equipment information must be included. Submit the completed rebate form by December 31st of the program year. Documentation will not be returned.
- ▶ Rebates will be credited to your electric account. Rebate dollars are limited and will be paid on a first come, first served basis. Rebate program is subject to change or cancellation without notice. Former Alliant Energy customers are ineligible for the program.
